BEGINNERS

Precision Lettering Equipment

If this is your first experience with a mechanical lettering device we welcome you to an interesting and enjoyable new skill. Unfortunately, everyone isn't a graphic artist or signmaker and every business or organization cannot justify a full time staff to handle these needs. This is where mechanical lettering devices can be most effective. With very little expense and a small amount of practice, almost everyone can become competent at graphically expressing their thoughts in a manner that is both attention getting and pleasing to the eye.

Easy to use following these four simple steps:

1. Select a template and lay it in place atop T-Square. Slide template back and forth a few times to make sure straight edge is secure. Place scriber in correct position (without pen) on template.
2. The tail pin rests in the horizontal groove and the tracing pen should be inserted into an engraved letter or symbol.
3. Choose a point, insert into scriber pen arm and fill with ink. Turn height-adjusting screw down far enough so that pen point does not quite contact paper surface when scriber is laid in place on template.
4. Turn height-adjusting screw back enough to allow pen to contact paper. Trace a few letters and continue until ink flow produces a solid line and pen point glides over surface.
5. **To cut vinyls, silk screen or masking films with the micro swivel knife, the height adjustment screw at the end of the scriber determines the depth of cut.**

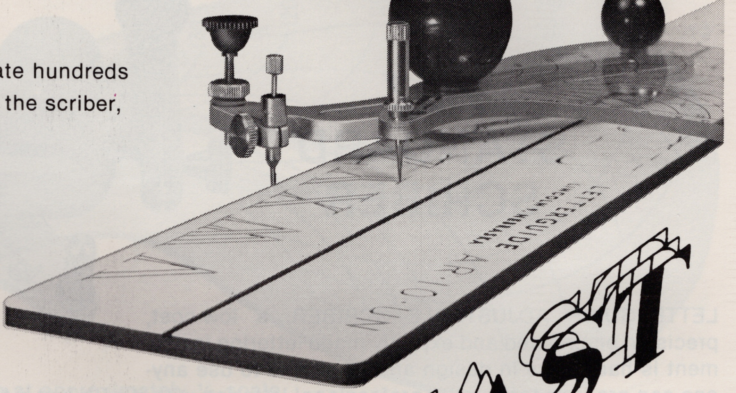
PROFESSIONALS

LETTERGUIDE INC.

Artists, designers, draftsmen, sign painters, amateurs and pros alike . . . produce professional lettering easily and quickly. Create special effects in half the time it would take using older, conventional methods.



Together, the Letterguide scriber and one template allow you to create hundreds of variations of infinite increments. With just a single adjustment to the scriber, one can:

Enlarge	Slant for Italics
Reduce	Shade & Shadow
Extend	Reverse
Condense	And More!

Do your own professional lettering in ink, ballpoint pen, lead pencil, even color design markers. Cut silk screen film, masking or even vinyls, letter in circles with Letterguide's easy adaptable accessories.

Put an end to the mess and expense of dry transfer lettering and stencils. Do away with paste-ups – give your project a clean, professional appearance.

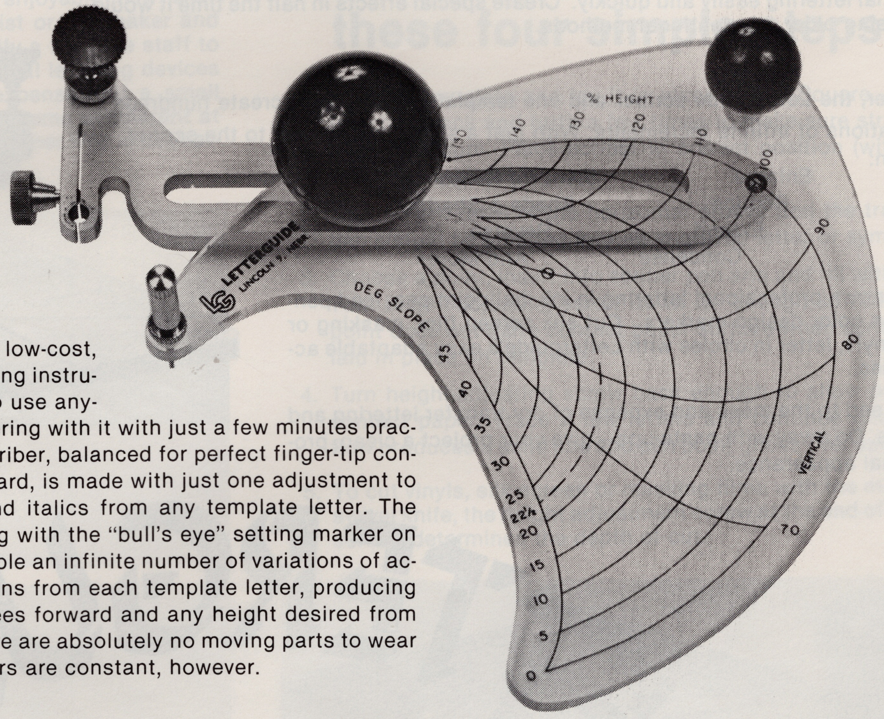
STANDARD SCRIBER

Precision Lettering Equipment

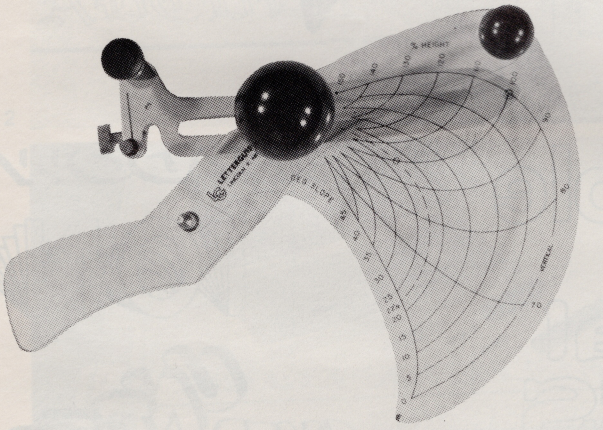
3 OZ. STANDARD SCRIBER



LETTERGUIDE ADJUSTABLE SCRIBER, a low-cost, precision engineered and expertly made lettering instrument is handsome in design and so simple to use anyone can produce top quality professional lettering with it with just a few minutes practice. This uniquely designed and calibrated scriber, balanced for perfect finger-tip control and maximum comfort on the drawing board, is made with just one adjustment to produce enlargements, reductions, slants and italics from any template letter. The calibrations on the face of the scriber working with the "bull's eye" setting marker on the end of the adjustable pen arm make possible an infinite number of variations of accurately defined angle and height combinations from each template letter, producing any angle desired from 0 degrees to 45 degrees forward and any height desired from 70% to 140% of the template letters size. There are absolutely no moving parts to wear or need continual adjustment. Widths of letters are constant, however.

YOU JUST LET THE SCRIBER DO THE WORK

Scriber shown actual size.



Letterguide's "Left-Hander" Scriber Attachment enables the left-handed person to letter with ease and comfort! Attachment allows a firm grip with full vision of both tracer pin and ink pen. (See accessories in back of catalog.)

LETTERGUIDE ADJUSTABLE SCRIBER

Fast – Easy – Versatile! This precision instrument does virtually all the work for you! It produces thousands of lettering variations with only a single adjustment . . . enlarges, reduces, slants, shades, shadows, reverses, overlaps, more! Our well-balanced precision scriber is the key to sharp, clean, controlled lettering.

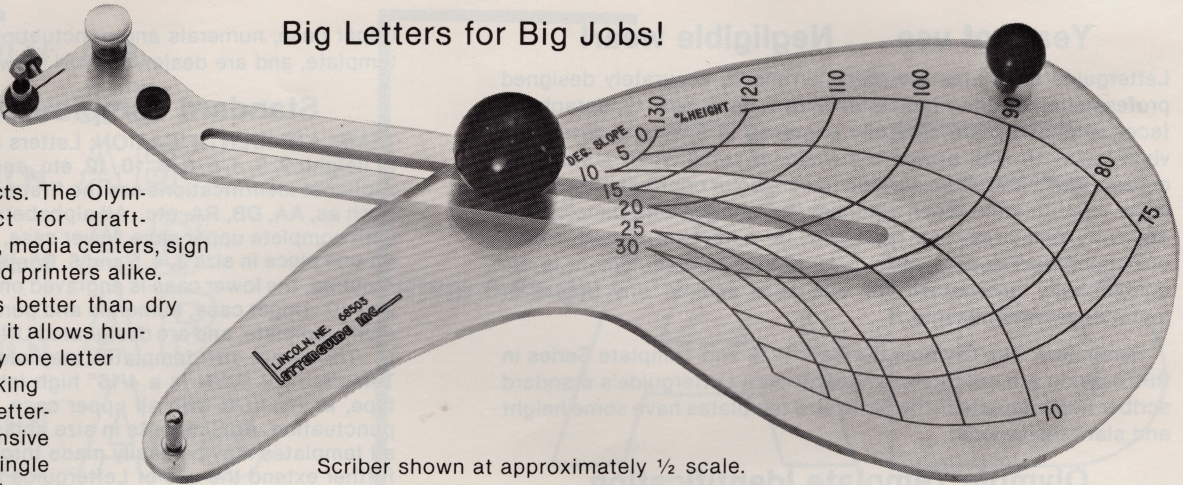
OLYMPIC SCRIBER

LETTERGUIDE INC.

Big Letters for Big Jobs!



Letterguide's Olympic Scriber® is ideal for headlines, posters, maps, signs, displays, silk screens, and many oversize projects. The Olympic Scriber® is perfect for drafting rooms, design studios, media centers, sign makers, display artists and printers alike.

Letterguide's system is better than dry transfer lettering because it allows hundreds of variations for any one letter style. No peeling, no cracking like some dry transfers. Letterguide is much less expensive in the long run than a single headline from the typesetter.

Scriber shown at approximately ½ scale.

Once the initial economical investment has been made, Letterguide's Olympic® equipment pays for itself over and over and over again!

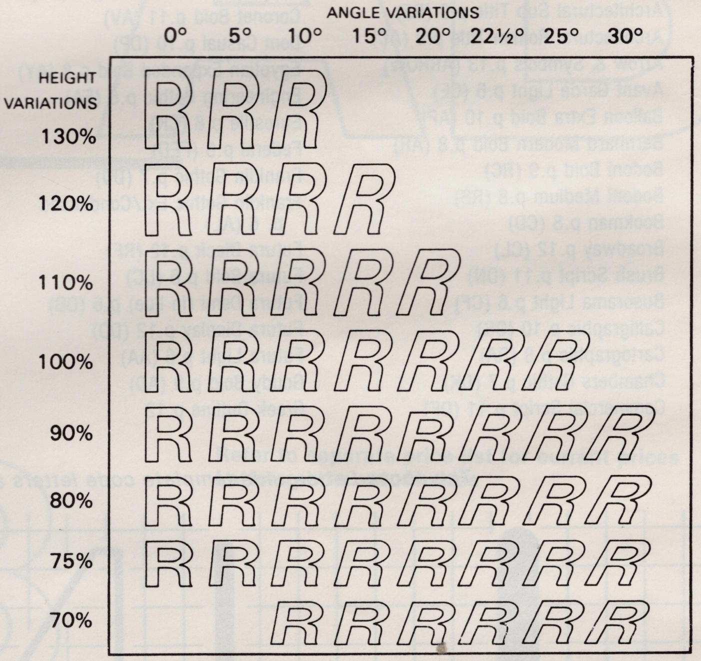
6 OZ. OLYMPIC SCRIBER®

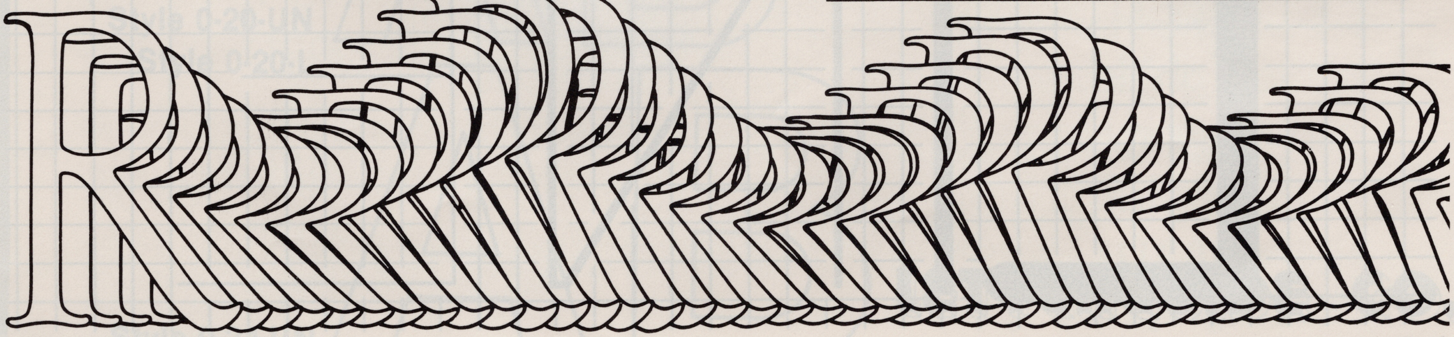
The Letterguide Olympic Scriber® 1232 — all new from Letterguide, Inc.! This low cost, precision engineered lettering instrument is designed especially for lettering requirements from ¾" up to and including 2". The Olympic Scriber® 1232 operates with the same ease and comfort as the standard Letterguide scriber which accommodates the ⅛" to ¾" lettering needs. You now have the selection of most every style offered in height sizes 12/16 (¾"), 16/16 (1"), 20/16 (1¼"), 24/16 (1½"), 28/16 (1¾") and 32/16 (2").

With a few minutes practice, one can produce top quality professional lettering with this uniquely designed and calibrated scriber. With only one adjustment of the pen holding arm, forward slants, enlargements and reductions are possible from whichever template is being used. For example: style "CH" (Helvetica medium) "16" (16/16" or 1") "UN" (upper case letters and numerals) can be lettered in a range including 130% height or 1.3", to 70% height or .7". If you wish to incorporate a forward slant, simply locate the bull's eye located in the end of the arm to the degree slant desired, tighten the large knob and you are ready to letter.

Normal wear on both tracer and tail pins will be the only cost of operation through many years of continued use. These items are available at a negligible cost. The perfect balance of Letterguide's Olympic Scriber® 1232 makes it simple to operate, allows the tracer pin to glide through the finely engraved letter groove without effort. Using the pressure control screw to limit down pressure exerted at the pen or knife point, one can produce clean, sharp, concise, professional lettering in just a fraction of the time it takes by other methods.

Note: Due to the overall size of the 32/16 (2") templates, the 130% and 120% heights and some slants are not possible. However, the 28/16 (1¾") and smaller templates offer full range of flexibility.





All the above lettering is a result of various settings from one template.

TEMPLATES

Precision Lettering Equipment

Years of use . . . Negligible wear!

Letterguide templates are precision made, accurately designed professional lettering templates with today's best typographical faces. Alphabets are carefully engraved in specially developed vinyl laminate with proven dimensional stability for lasting accuracy. Black and white surface-to-core color contrast offers easy letter identification. Each alphabet is complete with punctuation and all templates are designed to align horizontally without changing T-square setting. All Letterguide equipment is unconditionally guaranteed for one year against any defect in material or workmanship.

Reminders: The Olympic Scriber® 1232 and Template Series in this catalog are not interchangeable with Letterguide's standard scriber and templates. The 32/16 size templates have some height and slant limitations.

Olympic Template Identification

Letters are engraved in sixteenths of an inch in height: 12, 16, 20,24,28,32 and are marked accordingly. Alphabet identifications are the first two letters of each template such as, AA, DB, RA, etc.

Upper case, numerals and punctuation are always on the same template, and are designated UN. Lower case is designated L.

Standard Template Identification

TEMPLATE IDENTIFICATION: Letters are engraved in sixteenths in height: 2, 3, 4, 5, 6, 8, 10, 12, etc. and are marked accordingly. Alphabet identifications are the first two letters of each template such as, AA, DB, RA, etc. All alphabets with lower case are made with complete upper case, lower case, numerals and punctuation on one piece in size 3, 4, 5 and 6. Due to the length of the material required, the lower case is engraved on a separate piece in sizes 8 and 10. Upper case, numerals and punctuation are always on the same template, and are designated UN. Lower case is designated L. The larger size templates may require 3-4 templates. Thus: Template DB-4ULN is a 4/16" high letter, equivalent to 24 point type, in style DB with all upper case, lower case, numerals and punctuation. Adjustments in size and shape of the lettering from all templates may be easily made through the scriber settings to further extend the use of Letterguide templates.

All Letterguide equipment is unconditionally guaranteed for one year against any defect in material or workmanship.

CUSTOM ENGRAVED TEMPLATES

Do you find you are repeatedly drawing your individual designs, trade marks, logos, title blanks, signatures or combination of letters? If so - you may save considerable time with a special template made to your exact specifications. With this you not only draw any symbol in seconds, but you reproduce it exactly time after time. A few examples of special design elements are shown.

For an estimate on your special needs please send drawing to exact scale, with quantity and size needed.

CERTIFICATE LETTERING SET

Letterguide's Certificate Set is specially designed to facilitate the lettering of certificates, awards, diplomas, documents, and other presentations. Businesses, clubs, schools and churches will be particularly appreciative of this set. It's so easy, virtually anyone can produce professional lettering. Artistic talent is not required.

The complete working set consists of:

- one easy to use Letterguide standard scriber
- one 5/16" template (choose one of three styles shown and described at right)
- one 3/16" single line template (Helvetica) for lettering date, place, etc.
- one "00" lettering pen
- supply of ink
- convenient case (which stores easily)

ACCESSORIES

LETTERGUIDE INC.

CAM-LOCK T-SQUARE

LETTERGUIDE CAM-LOCK T-SQUARE. A complete line of professional grade stainless steel T-squares with locking device assures you of accurate parallel alignment and a rigid straight-edge to hold your template while lettering. The simple locking device eliminates the need for tacking or taping your square in place while lettering and guarantees an easier, more accurately aligned job. Each is calibrated in 16ths and works with calibrations on the Letterguide channel for quick, easy settings for line spacing and form ruling.

LETTERGUIDE CHANNEL is a precision extruded aluminum alloy specially designed for easy installation on the edge of any drawing board, drafting table, light table, work bench or desk and is calibrated in inches to match calibrations on the cam-lock T-square. This unit assures you of perfect alignment, an exact straight-edge even on an old board and can be installed in just ten minutes.

LETTERGUIDE CAM-LOCK ASSEMBLY is available as a separate item for quick, easy installation in standard T-squares now in use. The cam is precision machined to work inside the channel attached to the board and is easily installed by simply drilling one hole per the printed template furnished with each cam-lock assembly.

MICRO SWIVEL KNIFE

MICRO-PRECISION is now possible in cutting film for lettering or masks. The micro swivel blade floats in a chamber of lubricating gel, and pivots smoothly and effortlessly in a full circle with no binding, tearing or peeling of film.

This versatile tool can be used in the either of the LETTERGUIDE Scribers for cutting photographic masking films which are used as a film positive or negative since they block ultraviolet light. What has been a very tedious job of cutting letters out in smaller sizes by hand is now easy to produce in an inexpensive way making your lettering jobs a breeze. Vinyls, PVC-foil, polyester films and many other light weight materials used today can be cut out in minutes with LETTERGUIDE. Ideal for lettering requirements from 3/8" up to a full 2" size depending on the template.

The Micro Swivel Knife is supplied in a compact storage case with a scribe, separate lifting tool, lubricating gel, three blades and adapter to fit either of the LETTERGUIDE Scribers.

Adapters only are availble separately as are extra blades (packed three per tube.).

Micro Swivel Knife

BALL POINT PENS

BALL POINT PEN-STYLUS made with black and red producing inks for offset paper masters for direct reproduction and in blue ink for layout work. All ball point pens do an excellent job as a stylus for lettering direct on wax stencils and spirit masters. Fine line and medium line widths are available.

Red – Fine	Blue – Fine	Black – Medium
Black – Fine	Red – Medium	Blue – Medium

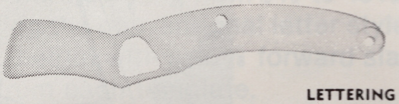
ACCESSORIES

Precision Lettering Equipment

LEFT HAND SCRIBER ATTACHMENT

Newly designed LETTERGUIDE scriber extension—designed and tested to enable the left handed person to letter mechanically with ease and comfort. Allowing a firm grip with full vision of the tracer pin and india ink pen. To attach—simply remove the two knobs and insert the attachment over the screws, then return the knobs and tighten.

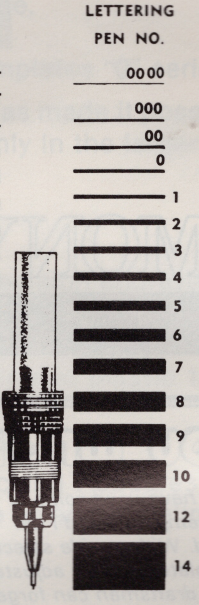
(Available for Standard Scriber only.)



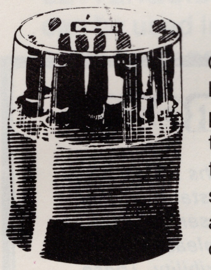
RESERVOIR PENS

RESERVOIR PENS are fountain type pens designed for freehand sketching, or direct lettering for any number of applications with your LETTERGUIDE equipment. Since many styles are in outline form, the need of a solid letter is achieved by using the same pen to fill in the letters. These pens are available in seven line widths (at right) the ink lettering pens range in sizes from No. 00 through No. 5. They eliminate repeated filling with ink as one filling will last several weeks, and do not require cleaning after each use as they come with air tight caps that prevent ink from drying in the pen tip. These pens are ideal for the lettering artist using india ink for lettering and ruling. The larger sizes may be used as fast, efficient fill-in pens and all sizes are ideal for ruling and lettering. Sizes 00 and 0 are recommended for outline lettering, sizes 2 and 3 for fill-in work. Line widths are shown to the right as ink lettering pen line widths.

RESERVOIR PENS—all sizes 00, 0, 1, 2, 3, 4, 5.



RESERVOIR PEN SET



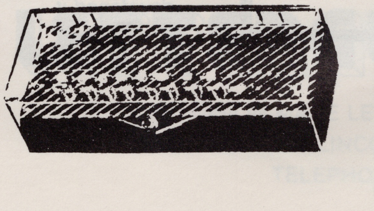
Contains 7 Reservoir Pens (00, 0, 1, 2, 3, 4 and 5) holder, ink filler bottle and bottle of pen cleaner; packed in a specially designed revolving caddy that has capacity to hold up to a dozen pens and three holders. The base of the caddy holds a sponge for humidifying, so pens stored uncapped and point down won't dry out. Set furnished with clamp to attach unit to board or table top.

INK PENS

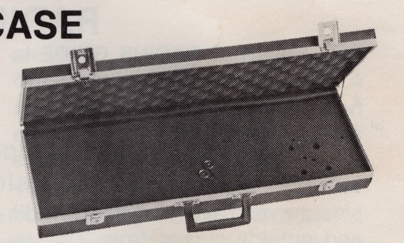
INDIA INK LETTERING PENS are familiar to all lettering draftsman and artists as precision designed, fine quality pens that produce clean, sharp finished lettering ready for camera reproduction. All pens come complete with cleaner pins and are used with all types of india inks, colored inks, water soluble and non-soluble, and with Di-Rect plate ink for offset paper masters. They are available in fifteen line widths ranging from No. 000 through No. 14. Cleaner pins are available for each size in case replacements are needed due to damage or misuse.

LETTERING PEN SET

Contains 8 Standard Pens, sizes 1 through 8, with empty spaces for 12 additional pens in convenient plastic box.



EQUIPMENT CASE



LETTERGUIDE equipment cases are of quality construction made of unique padded material and is waterproof, washable and scuff resistant. The inside foam inserts are pre-cut to accommodate any combination of templates. Simply pull out the sections needed as templates are added to the set.

(NOTE: this case will not accommodate most olympic templates.)

LUMOCOLOR® DESIGN MARKERS

Excellent, fiber-tipped markers (from Mars Staedtler) project consistently true, translucent vivid colors. Heat-proof and fade-proof, their inks will not bead. Produce sharp, instant drying markings on acetate, similar glossy surfaces, paper, poster board and professional bristol. These great pens are available in sets of four or eight colors, fine or medium points, permanent or non/permanent inks.

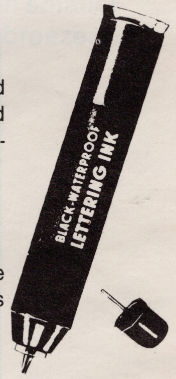
INK PEN CLEANER

INK PEN CLEANER solution is specially prepared for cleaning old dried ink from lettering pens and to freshen up pens that have been allowed to partially plug up with old ink. 2 oz. bottle.

BLACK INK

BLACK INDIA INK in special dropper cartridge designed specifically for filling lettering pens direct from the cartridge using each drop of ink.

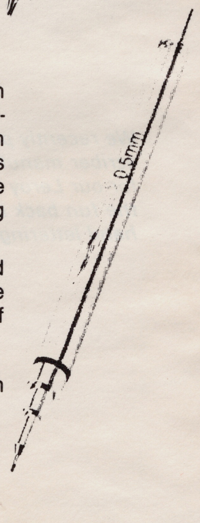


MECHANICAL PENCIL

MECHANICAL PENCIL, for 0.5 mm Lead—For uniform pencil lettering without the need to stop and repoint. Draws a 0.5 mm line that never varies in width. This top loading mechanical pencil has automatic pushbutton feed. Fits all Letterguide Scribers and is also ideal for professional drafting and general writing.

Pencil is of all-metal construction with brushed chrome finish. An eraser and cleaner wire are under the push-button top. Furnished with tube of 1 doz. 0.5 mm leads.

Leads, 0.5 mm—2 3/8 in. long, ultra-fine 0.5 mm diameter, HB degree, tube of 12.

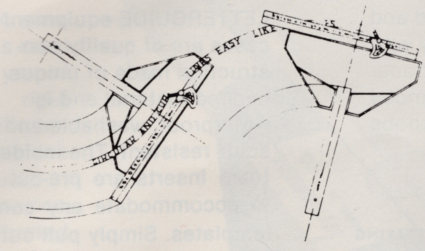


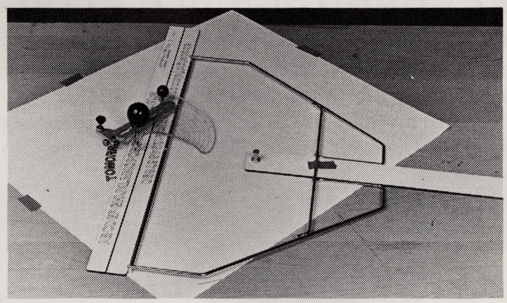
ACCESSORIES

LETTERGUIDE INC.

RADIUS GUIDE

LETTERGUIDE RADIUS GUIDE is a very useful device designed to hold the template and guide it around inside and outside curves for circular lettering. The radius arm is adjustable to produce inside curves from 1½" to 18" radii and outside curves from 3½" to 21" radii. It is easy to use, quick to set up and offers added variety to your Letterguide lettering.





Refer to separate price list for current prices.

TESTIMONY

Precision Lettering Equipment

We received your wonderful LETTERGUIDE order the other day, and in less than five minutes was completely sold. After less than an hour's practice, I turned out a silk screen job that would have normally taken about 16 man-hours, in less than three and a half hours. That's proof enough for me.

Photo Repro company in CA

YOU WROTE

I recently have used some of your lettering templates and I am impressed. With a wide selection of your templates and an adjustable scriber, a draftsman can forget about press-on letter forever.

Engineer in TX

We are sick of paying for half-used rub-on sheets with the most frequently used characters missing.

Sign Co. in PA

YOU WROTE

You may observe from your records that we have purchased quite a few of your templates and equipment. We have found them to be perfect for our knife-cut screens.

Silk screen shop in PA

YOU WROTE

For the past few months I have been using Letterguide adjustable scriber and several of the DB series lettering templates. I am quite pleased with their accuracy and flexibility. These qualities along with the speed of use are invaluable for my comprehensives and finished art work.

Designer in CA

YOU WROTE

I am fascinated by your Letterguide instruments to say the least! I have seen many lettering instruments in various catalogs, but never a set that makes so many different lettering styles. Simply amazing!

Lutheran Church in IN

We recently purchased an adjustable scriber manufactured by Letterguide, for our Leroy set. Your scriber puts the fun back in the tedious job of hand lettering.

Engineering Co. in CO

I have already tried out the new pens and they make a world of difference in the final result. Same for the T-Squares; it's the best thing since red wallpaper or canned beer. How I survived for so many years without one I'll never know. A resounding pat on the back to the person who developed it.

Hardware Co. in CA

LETTERGUIDE INC.

STANDARD SCRIBER: (for lettering templates 1/8" up to 3/4") Page 2

This unique lettering instrument gives the user the fexibility of enlarging or reducing within a range of 140% to 70% as well as forward slanting from 0⅞ to 45⅞ from any one of many templates available. The usr has the option of producing the conventional letter style or he may vary the height and slant by setting the arm, for example at 120% height with a 15⅞ forward slant. With a little imagination there are hundreds of letter variations possible from each template.

OLYMPIC SCRIBER: (for lettering templates "0" series 3/4" to 2") Page 3

This new addition to LETTERGUIDE has made it possible to offer the same versatility and wide selection of type styles as the standard scriber only in the larger sizes of 3/4" to 2".

TEMPLATES: Page 4

LETTERGUIDE Inc. strives to offer precision engraved lettering templates in modern style alphabets used by leading graphic artists, silk screen shops, engineers, educators, illustrators and sign painters. Ninety type styles are now available. Custom templates of symbols, signatures and logos are available upon request. Templates are made from laminated plastic 1/8" thick.

CAM-LOCKING T-SQUARE: Page 18

LETTERGUIDE stainless steel cam-locking T-squares are ideal for mechanical lettering. The cam-lock holds the square rigid by means of a single lever, thus eliminating bulky wire or taping.

MICRO SWIVEL KNIFE: Page 18

LETTERGUIDE introduces this micro-precision tool for cutting film for lettering or masks. This versatile tool can be used in either of the LETTERGUIDE Scribers. It puts an end to the task of cutting letters out in smaller sizes by hand. The Micro Swivel Knife is an easy, inexpensive tool which makes lettering jobs a breeze.

IMAGINATION, QUALITY, SERVICE!

More than 40 years ago, C. Ray Waddle recognized the need for a low cost, precision engineered lettering instrument. Since that time, his original idea has evolved into a manufacturing facility acknowledged throughout the country as the leader in innovative mechanical lettering products.

With currently 90 letter styles available, plus the ability to produce virtually any special style or graphic symbol, Letterguide has helped to free mechanical lettering from the confines of the draftsman's office and has ushered it into the exciting world of the graphic arts.

Over the years, Letterguide has introduced a number of unique graphic products. Among these are: an ingenious Cam-Lock T-square system, a precision radius guide which allows lettering in arcs and circles, and a special cutting tip for silk screen work. The Letterguide philosophy continues to combine a solid understanding of the practical aspects with an innovative approach to graphic procedures.

FAX# 402-488-0925

Dear Friend;

Thank you for your interest in LETTERGUIDE. Since you had returned the advertisement card, I can assume you do a considerable amount of lettering. Whether it be lay-out for large signs or banners, posters, screen printing of shirts and caps or headings and titles or whatever, LETTERGUIDE lettering equipment can be a tremendous time saver and aid for producing your very own unique letter styles with one simple adjustment of the scriber.

Imagine... the patch of film enclosed was cut in just seconds using the std. LETTERGUIDE scriber, one template style "Goudy Bold" 5/8" and the Micro Swivel Knife Set. If you do any hand cutting of film (water or lacquer base or even some of the tougher vinyls), you will be amazed at the ease of use and quality of lettering you can produce time after time using LETTERGUIDE.

The scribers use a variety of lettering ink pens, pencil, or knife attachments or with or with the available radius guides inside or outside curves are possible. LETTERGUIDE now offers close to 100 popular type styles in template form in a full range from 1/8" up to a full 2". As you will notice looking through the first few pages of the catalog, hundreds of letter variations are possible simply by enlarging, reducing or forward slanting from any template. You may wish to make block letters or shadows. This is accomplished simply by raising or lowering the t-square and lettering the special effects as desired.

A one time investment of less than $175.00 brings you a lifetime of future use with assurance of consistent and exact results each time you letter. For example the patch of film was produced using the following;

Std. Scriber...........	$51.50
Template, AD-10-UN.....	41.00
Micro Swivel Set.......	80.00
	$172.50

The lettering set #4001 is suggested for the silk screen business where lettering requirements are generally 3/4" and under. This size is ideal for making lay-outs and proposals where billboard or banner size lettering is required or lettering for caps and jackets. You may prefer to start with two or three templates and the appropriate scriber along with the proper writing tool that fits your immediate needs, then add fonts as needed at a later date.

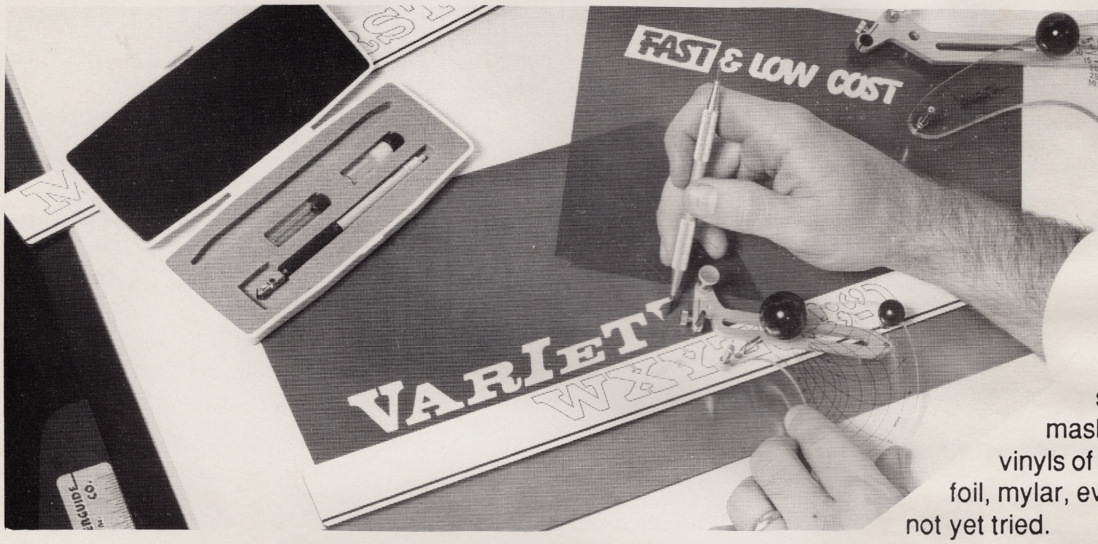
If you have any questions or wish to place an order, give me a call, 1-800-628-3304 and I will be happy to answer any questions.
Looking forward to hearing from you. Thank you.

Howard Waddle
General Manager.

HWaddle

LETTERGUIDE

Micro Swivel Knife



Micro precision is now possible in cutting letters into most films such as red or amber masking films, silk screen film, vinyls of any color, paper, gold leaf foil, mylar, even flocking plus materials not yet tried.

Ideal for creating positive or negatives for reproduction or cutting vinyl letters direct.Hundreds of letter variations possible from one template and you never run out of "E"s or if you're from Albuquerque, "Q"s. Select from over ninety letter styles. Mechanical lettering is very fast, consistent, creative, permanent, and low cost as one or two jobs will pay for the cost of each template.

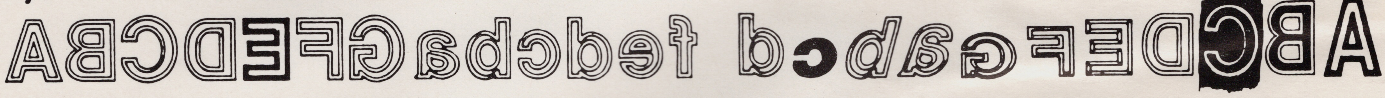
MICRO SWIVEL KNIFE SET: Consisting of Knife, Adapter, Lifting tool, three blades, lubricating gel, handle for free hand cutting and plastic case **$80.00**

MINI SWIVEL KNIFE: Consisting of knife, two blades, and gel **$37.00**

* * * * * * * * * * * * * * * *

TRANSTRIP™ (RUBY) as per sample LG above. Used for stripping of positives or negative. Available in rolls 40" x 150" **$37.00**

Style "CIR" Helvetica Reverse



REVERSE LETTERING, Style "CI Helvetica." Several requests over the past few years prompted us to furnish this new series template, especially for architects, sign painters and glass artists. As for the prices, refer to your price list and use the standard "CI" prices. When ordering, indicate reverse or, for example, "CIR-O-16-UN."

ER ABCDEFabc

If you require ¾" to 2" letter size, refer to the LETTERGUIDE "OLYMPIC" scriber and template series price list.

Template Identification:

Letters are engraved in sixteenths inch height 2,3,4,5,6,8,10,12, etc. and are marked accordingly. Alphabet identifications are the first two letters of each template, such as: AA, DB, RA, etc. All alphabets are made with complete upper case, lower case, numerals and punctuation on one piece in sizes 2,3,4,5, and 6. Due to the length of the material required, the lower case is engraved on a separate piece in sizes 8 and 10. Size 12 does not offer lower case, except in the Olympic Series. There are a few styles that do not have the lower case available. Refer to your catalog. Upper case, numerals and puncuation are always on the same template and are designated UN. Lower case is designated L. Thus: template DB-4-ULN is a 4/16" height letter, equivalent to 24 pt. type in style DB with all upper case, lower case, numerals and punctuation. Adjustments in size and shape of the lettering from all templates may be easily made through the scriber settings to further extend the use of your Letterguide templates.

Nearly all template sizes 2 through 6 are engraved in fine groove letters for increased sharpness and accuracy.

CUSTOM SIZES TO FIT YOUR NEEDS

If your desired size is not a standard item, please state the exact size needed and a custom template can be furnished. The only charge in addition to the template would be a set-up fee.

LETTERGUIDE, INC P.O. Box 30203 • LINCOLN, NE 68503 • USA Phone (402) 488-0925 FAX (402) 488-0925

6 OZ OLYMPIC SCRIBER.

The Letterguide Olympic Scriber® 1232 all new from Letterguide, Inc.—is designed especially for lettering requirements from ¾" up to and including 2". The Olympic Scriber® 1232 operates with the same ease and comfort as the standard Letterguide scriber which accommodates the ⅛" to ¼" lettering needs. By designating your selection "O", you now have the selection of most every style offered in height sizes 12/16 (¾"), 16/16 (1"), 20/16 (1¼"), 24/16 (1½"), 28/16 (1¾"), and 32/16 (2")

With a few minutes practice, one can produce top quality professional lettering with this uniquely designed and calibrated scriber. With only one adjustment of the pen holding arm, forward slants, enlargements, and reductions are possible from whichever template is being used. For example style "CH" (Helvetica medium) "16" (16/16" or 1") "UN" (upper case letters and numerals) can be lettered in a range including 130% height or 1.3", to 70% height or .7". If you wish to incorporate a forward slant, simply locate the bullseye located in the end of the arm to the degree slant desired, tighten the large knob, and you are ready to letter.

Normal wear on both tracer and tail pins will be the only cost of operation through many years of continued use. These items are available at a negligible cost. The perfect balance of Letterguide's Olympic Scriber® 1232 makes it simple to operate, allows the tracer pin to glide through the finely engraved letter groove without effort. Using the pressure control screw to limit down pressure exerted at the pen or knife point, one can produce clean, sharp, concise, professional lettering in just a fraction of the time it takes by other methods.

Note: Due to the overall size of the 32/16 (2") templates, the 130% and 120% heights and some slants are not possible. However, the 28/16 (1¾") and smaller templates offer full range of flexibility.

Designate Olympic size by adding "-O" to style selections
